501 W Plaza Real, Boca Raton, Florida 33432

SIZE

Approximately 40,000 SF

BUDGET

Approximately 2,000,000

COMPLETED

2021

PROJECT TEAM

Boca Raton Museum of Art | Client
GLAVOVIC STUDIO | Architect
Margi Glavovic Nothard | Artist
Studio Roberto Rovira and AAL | Landscape Architects
McNamara Salvia | Structural Engineer
Flynn Engineering and Louis Berger | Civil Engineer
Delta G Engineering | MEPF Engineer
Lighting Dynamics | Lighting Consultant
Jones Sign | Fabricator
Page Contracting | General Contractor
Robin Hill | Photography

"As a pedestrian going through this area, you wouldn't have chosen to walk around here,' Nothard says. Those who did could have glimpsed, through an old fence, the entrance to the loading dock, where the art-carrying trucks drive in. The new wall, on the other hand, invites engagement: A back-lit panel perched on one end offers wayfinding, and the wall itself covers up the loading dock entrance, producing a coherent visual image. Nothard collaborated with the Miami-based landscape architecture firm Studio Roberto Rovira to extend the sidewalk—and by extension the museum—up to the street, turning the space into a promenade. Her firm prioritized 'the goals of art and the public realm' by taking a skinny volume and turning it into a small, though powerful, public space."

"A Wall that Mends: GLAVOVIC STUDIO Designs a New Public Face for the Boca Raton Museum of Art"
